SAMPLE - Consent Evidence report

Product	Agent Harbor Evidence Reports (SAMPLE)
Target	http://127.0.0.1:35677/07-asymmetric/
Period	2026-10-28T03:25:59.244Z to 2026-10-28T03:26:04.786Z
Source data SHA-256	138385110777f0c3a391d01cc2461b35333012718f58401a51ca7dd21065a9ca

Notice

Technical evidence of observed behavior on the date tested. Not legal advice and not a certification of compliance.

SAMPLE

SAMPLE REPORT. Built from a synthetic test page served from the machine that built it, not from a customer's site. The figures are real measurements of that test page; the page was written by us to show an asymmetric banner. Nothing in it describes any real website.

Report details

Order	SAMPLE-ORDER
Report	Consent Evidence report
Website tested	http://127.0.0.1:35677/07-asymmetric/
Tested between (UTC)	2026-10-28T03:25:59.244Z and 2026-10-28T03:26:04.786Z
Where the test ran from	A server in the United States (country not recorded in this version)
Scanner	Compliance Signals engine 0.1.0; user agent ends with the AgentHarbor-ComplianceSignals token
Vendor list	harbor-seed 2026-10-27.1 (Agent Harbor LLC, original work, all rights reserved. Hand-curated from each vendor's own public documentation and the author's general knowledge of well-known tracker hostnames.)
Source data SHA-256	138385110777f0c3a391d01cc2461b35333012718f58401a51ca7dd21065a9ca

What this report is

What the page loaded and stored in four visits (Global Privacy Control on, reject, accept, close without choosing), with every rule result and the evidence behind it.

It records what an automated browser saw on the date above. It is technical evidence of observed behavior, not legal advice and not a certification of compliance. Another visitor, country, browser or day can see something different.

Result summary

Checks in this report	13
Issue observed	1

No issue observed	11
Could not be determined	0
Not applicable	1

What each visit loaded

Each visit used a fresh browser with no stored state. 'Tracker-category' means a request to a host on our hand-curated vendor list in the category analytics, advertising, social or session replay; a host not on the list is not counted, so these are minimums, not totals.

Visit	Page outcome	Requests	Third-party	Tracker-category	Cookies seen	Banner action
Global Privacy Control on, nothing clicked	completed	4	2	0	0	no click
Reject chosen	completed	4	2	0	2	Reject: 2 click(s)
Accept chosen	completed	6	4	2	4	Accept: 1 click(s)
Banner closed without choosing	completed	4	2	0	2	Close (without choosing): 1 click(s)

All checks

Check	Result	What was observed	Evidence ids
Tracker requests before any choice	No issue observed	No requests to tracker-category vendors were observed before the consent banner was used.	none
Tracker requests after Reject	No issue observed	No requests to tracker-category vendors were observed starting after the reject action (consent-mode cookieless pings are reported separately).	deny.op.0001
Tracker cookies after Reject	No issue observed	No cookies recognised as tracker-category were set or changed after the reject action. 1 other cookie(s) changed; they are not in the vendor list and are not judged.	none
Advertising requests with Global Privacy Control on	No issue observed	With Global Privacy Control signalled, no requests to advertising-category vendors were observed.	none
Google consent-mode default set late	No issue observed	The consent-mode default was set before any Google tag activity was observed.	deny.consent.0001
Google consent-mode default set to granted	No issue observed	Every observed consent-mode default denied ad_storage and analytics_storage (and the v2 keys when present).	deny.consent.0001, deny.consent.0005
Google consent-mode state differs from the choice	No issue observed	After the reject action, no consent update granted storage and no Google hit reported granted consent.	none
Cookieless Google pings after Reject (informational)	Not applicable	No cookieless consent-mode pings were observed after the reject action.	none
No banner seen, trackers loaded	No issue observed	A consent banner (onetrust) was detected.	deny.detect.0001
Banner could be operated	No issue observed	The banner's accept and reject controls could be operated and had an effect (or were simply absent; see asymmetric-click-cost).	deny.op.0001, accept.op.0001

Check	Result	What was observed	Evidence ids
Clicks to accept versus clicks to reject	Issue observed	Accepting took 1 click(s); rejecting took 2 (#onetrust-pc-btn-handler > #onetrust-pc-sdk .ot-pc-refuse-all-handler).	accept.op.0001, deny.op.0001
Closing the banner without choosing	No issue observed	After closing the banner without choosing, no tracker-category requests or cookies, and no consent grants, were observed.	close.op.0001
Choice remembered after reload	No issue observed	After choosing and reloading in the same browser session, the banner did not reappear.	deny.detect.0002

Requests to known vendors

Vendor	Category	Visit	Requests
Google Tag Manager	tag-manager	Accept chosen	2
Google Tag Manager	tag-manager	Banner closed without choosing	2
Google Tag Manager	tag-manager	Reject chosen	2
Google Tag Manager	tag-manager	Global Privacy Control on, nothing clicked	2
Google Analytics	analytics	Accept chosen	1
Meta Pixel	advertising	Accept chosen	1

Consent signals the page sent

Visit	Kind	Command	Parameters
Global Privacy Control on, nothing clicked	consent	default	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Global Privacy Control on, nothing clicked	gtag	js	arg=Wed Oct 28 2026 03:25:59 GMT+0000 (Coordinated Universal Time)
Global Privacy Control on, nothing clicked	gtag	config	arg=G-FIX
Global Privacy Control on, nothing clicked	consent	default	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Global Privacy Control on, nothing clicked	gtag	js	arg=Wed Oct 28 2026 03:25:59 GMT+0000 (Coordinated Universal Time)
Global Privacy Control on, nothing clicked	gtag	config	arg=G-FIX
Reject chosen	consent	default	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Reject chosen	gtag	js	arg=Wed Oct 28 2026 03:26:00 GMT+0000 (Coordinated Universal Time)
Reject chosen	gtag	config	arg=G-FIX
Reject chosen	consent	update	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Reject chosen	consent	default	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied

Visit	Kind	Command	Parameters
Reject chosen	gtag	js	arg=Wed Oct 28 2026 03:26:01 GMT+0000 (Coordinated Universal Time)
Reject chosen	gtag	config	arg=G-FIX
Reject chosen	consent	update	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Accept chosen	consent	default	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Accept chosen	gtag	js	arg=Wed Oct 28 2026 03:26:01 GMT+0000 (Coordinated Universal Time)
Accept chosen	gtag	config	arg=G-FIX
Accept chosen	consent	update	ad_storage=granted; analytics_storage=granted; ad_user_data=granted; ad_personalization=granted
Accept chosen	consent	default	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Accept chosen	gtag	js	arg=Wed Oct 28 2026 03:26:02 GMT+0000 (Coordinated Universal Time)
Accept chosen	gtag	config	arg=G-FIX
Accept chosen	consent	update	ad_storage=granted; analytics_storage=granted; ad_user_data=granted; ad_personalization=granted
Banner closed without choosing	consent	default	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Banner closed without choosing	gtag	js	arg=Wed Oct 28 2026 03:26:03 GMT+0000 (Coordinated Universal Time)
Banner closed without choosing	gtag	config	arg=G-FIX
Banner closed without choosing	consent	default	ad_storage=denied; analytics_storage=denied; ad_user_data=denied; ad_personalization=denied
Banner closed without choosing	gtag	js	arg=Wed Oct 28 2026 03:26:04 GMT+0000 (Coordinated Universal Time)
Banner closed without choosing	gtag	config	arg=G-FIX

What this report does not cover

Only the one page address you gave was loaded, once per visit type, from one location. Other pages, sign-in areas, other countries and mobile apps were not tested.

Evidence ids such as deny.req.0042 point to entries in the JSON file in your download page; the JSON is the complete record.

The scanner identifies itself, follows robots.txt and stops at bot-protection challenges; it does not try to get around them.

A banner control the scanner does not recognise is reported as not found. That is a limit of the scanner, not proof the control is missing.

'Could not be determined' means the evidence did not allow a result, for example because the banner could not be operated.

How to check this report's integrity

The JSON file in your download page is the complete record. Its sha256 field is the SHA-256 (hex) of the same JSON with that one field removed, written with object keys sorted at every level and no spaces. The value printed above as 'Source data SHA-256' should match it.

Screenshots

Screenshots are listed by SHA-256 and link; they are not embedded in this PDF. Compare the hash of a downloaded file with the one listed here.
